WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

High pressure will produce dry and mild weather throughout the region until this afternoon. Late today the high will weaken and move south as a winter weather system moves through the Pacific NW. The tail end of the cold front associated with the system will move into the far northern end of the region this evening and produce scattered light rain and mountain snow showers north of a line from Cape Mendocino to Alturas through tomorrow afternoon. S-SW winds will gust to 25-35 mph over the higher terrain and from the Cascade-Sierra crest east tonight and tomorrow. Light (gusts to 25 mph) N-NE downslope surface winds are expected early Sunday, but they will die off in the afternoon.

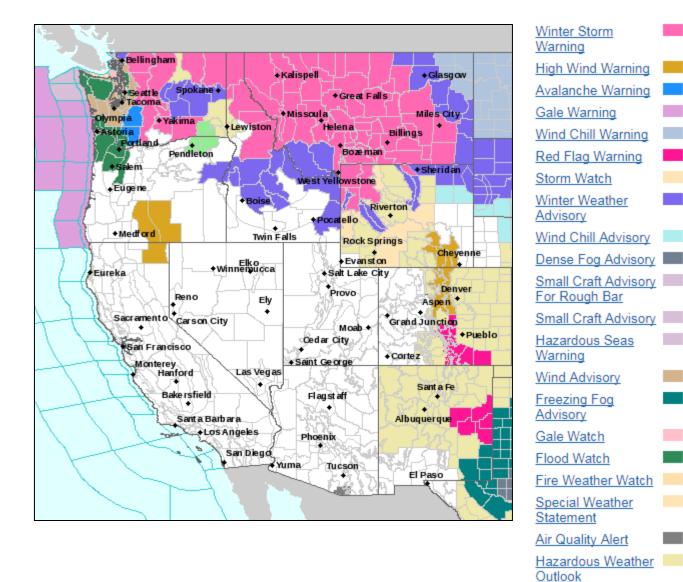

Computer models are now showing an offshore low pressure area becoming the main influence on the region's weather beginning Monday. The low will push warm moist air into the region from the SW, producing isolated to scattered mountain showers and occasional SE-SW breezes through Wednesday. There is a chance that the showers will increase over the area beginning Thursday.

SOUTHERN CALIFORNIA

A strong ridge of high pressure over California will cause temperatures to be 10 to 20 degrees above normal through today, with 60s to low 70s across the mountains and San Joaquin Valley and mid 70s to mid 80s in the coastal valleys. The ridge will weaken bringing around 5 degrees of cooling each day this weekend. Temperatures will then warm a couple of degrees each day early next week as the ridge of high pressure strengthens a little. Minimum humidity will be mainly in the single digits and teens away from the coast and San Joaquin Valley through tomorrow and then humidity will increase Sunday through early next week. Winds will be light across the entire region through early next week.

Nothing significant to report.

Cal OES MISSION TASKING

Cal OES Missions

- 2017-Cal OES-42559: Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene).
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County.
- 2017-SOC-44022: Two E-BAM (air monitors) from Air Resources Board/Office of Emergency Response to monitor smoke from the Thomas Fires. Location one: Olga Reed Elementary School (480 Centennial St., Los Alamos); Location two: Carpinteria City Hall (5775 Carpinteria Ave., Carpinteria) (On Scene).
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene).

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
